About me

I am an indie game designer and developer interested in several fields of game development, but above all I have a focus on programming, mechanics design and level design. With each new project I try to make it different from the previous ones I have worked on in order to be constantly learning new skills and be able to improve my knowledge of the industry as much as possible.

Experience

Game Developer - Doctors Without Borders Spain (2023)

- UI programming
- Music and VFX design and programming
